[Portfolio](#)

## Professional Summary

Senior Game Developer with **9+ years of experience developing games and real-time interactive experiences** across **mobile, PC, VR, AR, WebXR, and interactive installations**.

Specialized in building **gameplay systems, XR interactions, and immersive applications** using **Unity (C#)** and **Unreal Engine 4 (Blueprints)**. Experienced in delivering **mobile games, VR event experiences, AR applications, WebAR activations, and simulation prototypes** for enterprise clients, marketing events, and digital products.

Proven ability to lead development teams while remaining hands-on with gameplay programming, interaction systems, and technical architecture. Strong experience integrating **backend services, AI APIs, and cross-platform XR technologies**.

## Core Technical Skills

### Game Development

Gameplay Systems Architecture

Real-Time Interaction Systems

Mobile Game Development

Hyper-Casual & Casual Games

Multiplayer Gameplay Prototypes

## **Game Engines**

Unity (Advanced – C#)

Unreal Engine 4 (Blueprints)

## **XR Technologies**

VR: Oculus Quest, Oculus Go, Oculus Rift, Gear VR

AR: ARCore, AR Foundation

WebXR / WebAR: Zappar, 8thWall

## **Interactive Installations**

Kinect v1 Motion Interaction

Touchscreen Interactive Systems

## **Backend & Integrations**

Firebase

REST APIs

OpenAI APIs (ChatGPT, TTS, Whisper)

## **Platforms**

Android

iOS

PC

WebGL

VR Headsets

# **Professional Experience**

## **5DVR**

### **Game Development Team Leader**

**May 2024 – Present**

Leading a team of **4–5 developers** building XR applications, mobile games, and interactive installations.

#### Responsibilities

- Leading development pipelines and system architecture for XR and interactive applications
- Managing sprint planning, task allocation, and development timelines
- Mentoring developers and reviewing gameplay systems
- Collaborating with clients to align technical implementation with business goals
- Integrating AI systems and backend services into interactive applications

#### Key Projects

##### **Elle3ba – Mobile Team Building Game**

Platform: iOS / Android

Engine: Unity

A team-building application where players complete real-world challenges and submit photo/video proof, with leaderboard tracking and challenge management.

##### **Window AR Application**

Platform: Mobile

Engine: Unity (AR Foundation)

Augmented reality visualization app demonstrating installation steps and final product appearance.

##### **AI Interactive Agents (WebGL)**

Platform: Web

Engine: Unity

Interactive AI agents with voice conversations using **ChatGPT, TTS, and Whisper APIs**.

##### **Pfizer WebAR Experience**

Platform: Web

Technology: Zappar

Web-based AR application guiding users through medication usage using interactive AR instructions.

## Game Developer

**Nov 2021 – May 2024**

Developed VR experiences and interactive applications using Unity and Unreal Engine.

Key Project

### **Qat Workshop VR Experience**

Platform: Oculus Quest

Engine: Unreal Engine 4 (Blueprints)

A VR cultural experience created for **Saudi National Day events**, teaching traditional **Qat painting and pottery colouring techniques**.

Responsibilities

- Implemented gameplay systems using Blueprint
- Developed VR UI interaction systems
- Implemented player interactions within the experience

### **Mars-Mea App**

Platform: Android and IOS

Engine: Unity3D

**Mobile App** for sales courses registration, academy news feed, games for testing knowledge from courses and gaining certificates

Responsibilities

- Implemented login and registration flow
- Implemented newsfeed logic with comments, likes, replies and uploading new posts

# University of Hertfordshire

## Game & VR/AR Teaching Assistant

Sep 2023 – Jun 2024

- Designed and delivered practical Unity game development sessions
- Mentored students in gameplay programming and architecture
- Supervised student game projects and development pipelines

## Brandmark

### Game / VR / AR Developer

Mar 2021 – Nov 2021

Developed interactive installations and VR experiences for **corporate marketing events**.

Projects

#### Virtual Bowling

Platform: Oculus Quest

Engine: Unreal Engine 4 (Blueprints)

VR bowling experience created for **Eva Pharma Milga Advance product launch event**.

Responsibilities

- Implemented gameplay logic
- Developed VR UI interactions

#### Collecting the Falling Tablets

Platform: Kinect v1

Engine: Unity

Motion-controlled installation where players collect falling objects using body movement tracked by Kinect.

### **Fruit Ninja Interactive Game**

Platform: Touchscreen

Engine: Unity

Interactive slicing game inspired by Fruit Ninja, created for **Eva Pharma Limitless launch event.**

## **EG-Gate**

### **Game / VR / AR Developer**

**Dec 2018 – Dec 2020**

Developed AR games and VR applications for tourism, sports, and retail experiences.

Projects

#### **AR Sports Games**

Platform: Android / iOS

Engine: Unity (ARCore)

A suite of AR mini-games including:

- Basketball
- Darts
- Penalty shootout
- Ball through tires

#### **360 VR Walkthrough Applications**

Platform: Gear VR / Oculus Go

Engine: Unity

Virtual walkthrough experiences for **touristic locations and real estate visualization.**

#### **Virtual Tourism Experience**

Platform: PC

Engine: Unreal Engine 4

Interactive virtual exploration experience for tourism visualization.

### **Virtual Mall Experience**

Platform: PC

Engine: Unreal Engine 4

A virtual mall environment enabling interactive shopping exploration.

## **Creative Motion**

### **Game Developer**

**Apr 2018 – Oct 2018**

Worked on VR training simulations and gameplay systems.

Projects

#### **Military Simulation Prototype**

Platform: PC

Engine: Unreal Engine 4

Implemented gameplay subsystems including:

- Bullet physics
- Ricochet systems
- Core gameplay mechanics

#### **Car Training Simulation**

Platform: Oculus Rift

Engine: Unity

Driving simulation featuring physics-based vehicles and AI traffic systems.

# Approcks

## Game Developer

**Oct 2016 – Apr 2018**

Developed mobile educational and casual games.

Projects

### **TemoLand**

Platform: Android / iOS

Engine: Unity

Educational mobile game featuring interactive learning gameplay.

### **CandyMasry**

Platform: Android / iOS

Engine: Unity

Match-three puzzle game integrated with a companion mobile application.

# Personal Projects

### **Frizzle – Convert Your Best Friend to Puzzle**

Platform: Android (Google Play)

Engine: Unity

Puzzle game allowing players to convert personal images into sliding puzzles and play them.

# Education

BSc Computer Science – Information Systems

Benha University – 2016

# Certifications

Scrum Master Course

# Languages

Arabic – Native

English – Professional
