

Ahmed Aglan

Senior Unity Gameplay Engineer Maadi, Cairo, Egypt | +201288950926 |
ahmedaglan993@gmail.com **Nationality:** Egyptian | **Military Status:** Exempted

Professional Summary

Strategic and highly technical **Senior Unity Developer** with over 9 years of experience delivering high-performance mobile games and interactive systems. Expert in architecting scalable gameplay systems, integrating complex backend services, and optimizing for mobile platforms including iOS and Android. Proven track record as a Technical Lead managing full-cycle development pipelines, from initial prototyping to live-ops and monetization integration. Adept at working as a remote collaborator, ensuring maintainable codebases and high-fidelity user experiences across diverse interactive mediums.

Core Technical Competencies

Gameplay & Mobile Development

- **Unity (Advanced) & C#:** Expert-level proficiency in engine architecture and scripting.
- **Mobile Production:** End-to-end development for Android and iOS platforms.
- **Live Feature Development:** Iterative creation of systems for live-operated titles.
- **Monetization:** Skilled in Unity Ads and In-App Purchase (IAP) integration.
- **Optimization:** Performance tuning and debugging for mobile hardware.

Backend & Systems Integration

- **Service Integration:** Deep experience with Firebase, OpenAI APIs (ChatGPT, TTS, Whisper), and WebGL.
- **Data-Driven Systems:** Designing gameplay systems powered by external SDKs and web services.
- **Analytics Monitoring:** Implementing tools to track player behavior and game performance.

Architecture & Engineering Practices

- **Scalable Design:** Building maintainable architectures for AR, AI, and multiplayer applications.
- **Technical Leadership:** Experienced in mentoring engineers and leading cross-functional teams.
- **Agile/Scrum:** Expert in Scrum methodologies and technical project estimation.

Additional Expertise

- **XR Systems:** AR Foundation, OpenXR, Oculus SDK, and Kinect.
- **Unreal Engine 4:** Secondary proficiency for high-fidelity simulations.

Professional Experience

5DVR | Game Development Team Leader | Nov 2021 – Present

- Led the development of immersive Unity and Unreal applications, prioritizing modular systems and performance.
- Engineered scalable AI-driven experiences by integrating OpenAI APIs for real-time interactive agents.

Managed project timelines, task allocations, and development pipelines using Agile workflows.

- Served as a technical liaison to align engineering solutions with business goals and client requirements.

University of Hertfordshire | Game & VR/AR Teaching Assistant | Sep 2023 – June 2024

- Designed and delivered a comprehensive Unity game development course focusing on 2D/3D architecture.
- Mentored students in C# coding best practices, gameplay design, and project management.

Brandmark | Game, VR/AR Developer | March 2021 – Nov 2021

- Developed high-traffic interactive systems and multiplayer environments for event launches.

- Collaborated with artists to translate creative concepts into functional, performant applications.

EG-Gate | Game, VR/AR Developer | Dec 2018 – Dec 2020

- Engineered mobile AR sports games and VR walkthrough systems for tourism and retail.
- Integrated various SDKs and services into mobile applications to support interactive features.

Creative Motion | Game Developer | April 2018 – Oct 2018

- Developed advanced physics-based driving simulators with AI-driven traffic systems.
- Contributed to a multiplayer military shooter in Unreal Engine 4 focusing on weapon systems.

Approcks | Game Developer | Oct 2016 – April 2018

- Programmed core gameplay mechanics for 2D/3D educational titles on mobile.
- Integrated SDKs and web services to support multiplayer and live-service functionalities.

Key Engineering Projects

- **Elle3ba (iOS & Android):** Lead Engineer for a team-building app featuring real-time leaderboards and video/photo submission systems.
- **TemoLand (Android & iOS):** Developed core gameplay for a 2D educational title; integrated Facebook SDK and IAP for live-op support.
- **AI Demos (Unity WebGL):** Architected interactive agents using ChatGPT, TTS, and Whisper APIs for low-latency voice interaction.
- **CandyMasry (Android & iOS):** Programmed mechanics for a mobile match-three puzzle game.
- **Mars-Mea:** Developed a gamified mobile platform for sales courses and certification tracking.

Education & Certifications

- **BSc in Computer Science - Information Systems**, Benha University, Egypt (2016)
- **Scrum Master Course** (Completed)
- **Languages:** Arabic (Native), English (Fluent)
